CONTENTS TO PARTS I AND II

Preface ix
Committees and sponsors x
Contents to Parts I and II xi

PART I

(first volume, pages 1–558)

OPENING SESSION

AIGRAIN, P., Welcome address (*not included in these proceedings*)
BALKANSKI, M., Opening address 5

PLENARY SESSION

WATKINS, G.D., Deep levels in semiconductors 9
NOZIÈRES, P., Phase transitions in electron–hole liquids 16
TOYOZAWA, Y., Symmetry breaking excitonic instabilities in deformable lattice 23
ANDERSON, P.W., Localization redux 30

SPECIAL SESSION: RECENT DEVELOPMENTS IN TRANSISTOR TECHNOLOGY

DENNARD, R.H., Physical limits to VLSI technology using silicon MOSFETs 39
ZYLBERSZTEJN, A., The effects of deep levels in GaAs MESFETs 44
RYUZAN, O. and MISUGI, T., New developments in III–V transistor technology 50

1 - ELECTRONIC STATES

KOBAYASHI, K.L.I., DAIMON, H., WATANABE, N., TANIGUCHI, M., SUGA, S., NAKASHIMA, H. and MURATA, Y., Evidence for interference between direct and inner-shell deexcitation photoemission in semiconductors 57
SPICER, W.E., SILBERMAN, J.A., MORGEN, P., LINDAU, I., WILSON, J.A., CHEN, A.B. and SHER, A., Unusual behavior of $Hg_{1-x}Cd_xTe$ and its explanation 60
BLACHA, A., CARDONA, M., CHRISTENSEN, N., VES, S. and OVERHOF, H., Volume dependence of the spin–orbit splitting in the copper halides 63
MIURA, N., KIDO, G., SUEKANE, M. and CHIKAZUMI, S., Cyclotron resonance study of the conduction band in GaP 66
ANTONCIK, E. and GU, B.L., On the Mössbauer isomer-shift studies of the electronic structure of semiconductors 69
MELONI, F., MOOSER, E. and BALDERESCHI, A., Bonding nature of conduction states in electron-deficient semiconductors: Mg_2Si 72
LONG, A.P. and PEPPER, M., Quantum corrections to conductivity and energy relaxation in InP and InSb 75
SELLONI, A. and PANTELIDES, S.T., Electronic properties of heavily-doped n-type silicon 78
THOMAS, G.A., Experimental test of localization in semiconductors 81
GHAZALI, A. and SERRE, J., Electronic states of doped semiconductors: a multiple scattering approach 84

2 - SHALLOW IMPURITY STATES

WASILEWSKI, Z., DAVIDSON, A.M., STRADLING, R.A. and POROWSKI, S., Far-infrared studies of the bound and free carriers in n-InSb as a function of hydrostatic pressure 89
KONCZEWICZ, L., LITWIN-STASZEWSKA, E., POROWSKI, S., ILLER, A., AULOMBARD, R., ROBERT, J.L. and JOULLIÉ, A., Metastable donor states in Te-doped $Ga_{1-x}Al_xSb$ compounds 92
CAMASSEL, J. and MATHIEU, H., Symmetry-breaking effects on N-bound excitons in GaP *(invited)* 96
MARIETTE, H., THIERRY-MIEG, V., CHEVALLIER, J. and LEROUX HUGON, P., Disorder and N–N transfer mechanism in nitrogen-bound exciton luminescence of GaP_xAs_{1-x}: N systems 102
BENOIT À LA GUILLAUME, C., Shallow isoelectronic excitons revisited 105
DOS SANTOS, M.P., HIRLIMANN, C. and BALKANSKI, M., Local induced activity in resonant Raman scattering of GaP:N 108
PAJOT, B., COMPAIN, H., LEROUILLE, J. and CLERJAUD, B., Spectroscopic studies of 450° C thermal donors in silicon 110
WAGNER, J. and SAUER, R., Excitation spectroscopy in silicon: pseudo-acceptor excited states of the isoelectronic A, B, C exciton system 113
THEIS, W.M., BAJAJ, K.K., LITTON, C.W. and SPITZER, W.G., Direct evidence for the site of substitutional carbon in GaAs using localized vibrational mode spectroscopy 116
CANHAM, L., DAVIES, G., LIGHTOWLERS, E.C. and BLACKMORE, G.W., Complex isotope splitting of the NO-phonon lines associated with exciton decay at a four-lithium-atom isoelectronic centre in silicon 119
ALTARELLI, M., Excited states of double donors in silicon 122
JANZÉN, E., STEDMAN, R. and GRIMMEISS, H.G., Fano resonances in sulfur, selenium and tellurium doped silicon 125
NEW, D. and CASTNER, T., ESR studies of donor clusters in silicon 128
OHYAMA, T., Far-infrared magneto-dynamics of photo-excited electron system in gallium arsenide 131

3 - DEEP IMPURITY STATES - DEFECTS

VIGNERON, J.P., SCHEFFLER, M. and PANTELIDES, S.T., Electronic structure of self-interstitials and sp-bonded intersti-tial impurities in semiconductors 137
DEAN, P.J., Oxygen in gallium phosphide – a canonical deep donor *(invited)* 140
MORGAN, T.N., The electronic states of oxygen in gallium phosphide 146
FEENSTRA, R.M. and McGILL, T.C., Dissociation of (Zn,O) pairs in GaP 149
LANGER, J.M., SUCHOCKI, A., LE VAN HONG, CIEPIELWSKI, P. and WALUKIEWICZ, W., Auger effect at localized impurities in semiconductors 152
HOUSIN, M., FIALIN, M., SAGNES, G., BASTIDE, G. and ROUZEYRE, M., Physical properties of the deep X electron trap responsible for long time persistent photocapacitance in CdS 155
MENESES, E.A., MENESES, G.D. and MOTISUKE, P., Radiative recombination of deep centers in ZnSe:In 160
BRAUNSTEIN, R., KIM, R.K., MATTHEWS, D. and BRAUNSTEIN, M., Derivative absorption spectroscopy of GaAs:Cr 163
SEILER, D.G., GOODWIN, M.W. and LITTLER, K.H., Laser-induced magneto-optical transitions from deep levels in n-InSb 167
SKOLNICK, M.S., UIHLEIN, C. and KRATH, H., Zeeman spectroscopy of cobalt doped InP 170
SHANABROOK, B.V., KLEIN, P.B. and BISHOP, S.G., Evidence for associated deep donor–shallow acceptor pair recombination for the EL2 emission band in GaAs 173
SIBILLE, A., RAO, E.V.K. and MIRCEA, A., Transition metal impurities in InP: defect complexes and native defects 176
BARANOWSKI, J.M., JEŻEWSKI, M. and LIRO, Z., Compensation mechanism in Ni diffused n-type GaP 179
LITTY, F., LEYRAL, P., LOUALICHE, S., NOUAILHAT, A., GUILLOT, G. and LANNOO, M., Deep level optical spectroscopy of the levels introduced by transition metals in GaAs 182
ZUNGER, A. and LINDEFELT, U., Electronic structure of substitutional 3d transition atom impurities in silicon 185
JANTSCH, W., WÜNSTEL, K., KUMAGAI, O. and VOGL, P., Deep levels in semiconductors – influence of hydrostatic pressure 188
VAVILOV, V.S., USHAKOV, V.V. and GIPPIUS, A.A., General trends in the luminescence properties of transition elements centres in III–V semiconducting compounds 191
REINECKE, T.L., Pairs in intrinsic defects in III–V semiconductors: electronic states and interaction energies 194
SUMI, H., Dynamical theory of recombination-enhanced defect reactions 197
TCHAKPELE, K., ALBERT, J.P. and GOUT, C., Study of ideal vacancies in CdS and CdSe in the wurtzite structure 200
LABUSCH, R., One dimensional transport along dislocations *(invited)* 203

4 - TRANSPORT: LINEAR-NON-LINEAR; HOT ELECTRONS

LEBURTON, J.P. and HESS, K., High energy diffusion equation for polar semiconductors 211
MÜNZEL, H., BIMBERG, D. and STECKENBORN, A., Direct evidence for screening of carrier-acoustic phonon interaction at low to medium carrier densities in GaAs 214
HERBERT, D.C. and TILL, S.J., Field dependent scattering and hot electron kinetics 217
KOCEVAR, P., PÖTZ, W. and POROD, W., Cooling rates of highly photoexcited electron–hole plasmas in semiconductors 220
KAJITA, K., Transport phenomena of hot holes anomalously distributed in a warped energy band of silicon 223
POŽELA, J.K., STARIKOV, E.V., SHIKTOROV, P.N., VOROBJEV, L.E., OSOKIN, F.I., STAFEEV, V.E. and TULUPENKO, V.N., The experimental and theoretical investigation of the hot hole population inversion and far IR radiation generation in p-Ge under **E**⊥**B** fields 226
CHEBOTAREV, A.P., MURZIN, V.N., STOKLITSKY, S.A., IVANOV, Yu.L., VASILIEV, Yu.B., ANDRONOV, A.A., CHERNOBROVTSEVA, M.D., GAVRILENKO, V.I., KOZLOV, V.A., KRASILNIK, Z.F., MAZOV, L.S., NEFEDOV, I.M., NOZDRIN, Yu.N. and SHASTIN, V.N., Population inversion and far IR emission of hot holes in Ge in crossed electric and magnetic fields 229
MANSFIELD, R., ZHONGGAN, C. and FOZOONI, P., Low frequency hopping conduction in n-type InSb in the magnetic freeze-out region below 1 K 232
KADRI, A., AULOMBARD, R.L., BOUSQUET, C., RAYMOND, A., ROBERT, J.L., POROWSKI, S. and KONCZEWICZ, L., New results in transport phenomena in uncompensated n-type InSb with extremely low carrier density 235
HAMAGUCHI, C., TERASHIMA, K., SHIBATOMI, A. and RYUZAN, O., Effect of boundary conditions on hot electron transport in short semiconductors 238
POTTIER, N., An approach to non-stationary hot electron transport by the Langevin equation method 241
TAKITA, K., O-HATA, K. and MASUDA, K., Magnetophonon oscillation in the conduction band and phonon-drag-enhanced magnetophonon peak of thermoelectric power of tellurium 244
EVRARD, R., LAMBIN, P. and SCHMIT, J., Theory of relaxation of hot electrons and oscillatory photoconductivity in polar semiconductors 247
LUGLI, P. and FERRY, D.K., Effect of electron–electron scattering on Monte Carlo studies of transport in submicron semiconductor devices 251
ORTUÑO, M. and POLLAK, M., The activation energy of impurity conduction with sequentially correlated hopping 254
GERSHENSON, E.M., MEL'NIKOV, A.P., MURZIN, V.N., RABINOVICH, R.I. and TROFIMOV, I.E., Delocalization of H⁻-like impurity states and formation of band type impurity conductivity in semiconductors 257

5 - EXCITONS, POLARITONS AND BIEXCITONS

HORNUNG, Th. and ULBRICH, R.G, Faraday rotation in the lowest exiton resonance of gallium arsenide 263
SKOLNICK, M.S. and DEAN, P.J., Bound and free exciton states in InP 266
GISLASON, H.P., MONEMAR, B., DEAN, P.J. and HERBERT, D.C., Crystal field splitting of excitons bound to neutral complexes in GaP 269
KOBAYASHI, M., OHNO, Y., ENDO, S., CHO, K. and NARITA, S., Instability of self-trapped exciton caused by hydrostatic pressure in AgCl 272
KANEHISA, M.A, Exciton dispersion in degenerate bands 275
BÜTTNER, H. and POLLMANN, J., Excitons in polar semiconductors *(invited)* 278
IADONISI, G. and BASSANI, F.G., Excitonic polarons and core excitons: dielectric relaxation and optical transitions 284
ADAMOWSKI, J., GERLACH, B. and LESCHKE, H., Polaronic versus bare excitons: a functional-integration approach to the exciton–phonon problem 287
SCHREIBER, M. and TOYOZAWA, Y., The origin of the Urbach tail – a Monte Carlo study of the exciton absorption lineshape 290
STRINATI, G., Core excitons in semiconductors with a decaying core hole 293
MERLE, J.-C., BIVAS, A., WECKER, C. and GRUN, J.-B., Momentum resolved polariton spectroscopy in CuBr in the presence of magnetic field 296
PEYGHAMBARIAN, N., CHASE, L.L. and MYSYROWICZ, A., Momentum-space condensation of probe-injected biexcitons into a strongly pumped biexciton state in CuCl 299
ABRAM, I., MARUANI, A., CHEMLA, D.S., BONNOUVRIER, F. and BATIFOL, E., Theoretical and experimental aspects of the nonlinear spectroscopy of biexcitons in CuCl 301
FEHRENBACH, G.W., SCHÄFER, W., TREUSCH, J. and ULBRICH, R.G., Non-equilibrium exciton phase in the high density regime of a direct-gap semiconductor 303
KLEINEFELD, Th., STOLZ, H. and VON DER OSTEN, W., The role of iodine for the luminescence of highly excited AgBr 306
SEGAWA, Y., AOYAGI, Y., KOMURO, S., NAMBA, S., INOUE, S. and NAKAYAMA, M., Determination of additional boundary conditions in CuCl 309

6 - ELECTRON-HOLE LIQUID AND PLASMA

REINECKE, T.L., FORCHEL, A., SCHWEIZER, H., LAURICH, B., HANGLEITER, A., WAGNER, J. and SCHMID, W., Electron-hole liquid condensation: systematics and scaling relations 315
SCHWEIZER, H., FORCHEL, A. and SCHMID, W., Thermodynamic properties of equilibrium and non-equilibrium plasmas in GaP 318
WOLFE, J.P., Interaction of phonons with the electron-hole liquid *(invited)* 321
TIMOFEEV, V.B., KULAKOVSKII, V.D. and KUKUSHKIN, I.V., Spin aligned exciton gas in uniaxially compressed Ge *(invited)* 327
CAPIZZI, M., FROVA, A., MARTELLI, F., MODESTI, S., QUAGLIANO, L.G., STAEHLI, J.-L., GUZZI, M., LOGAN, R.A. and CHIARETTI, C., The E-H plasma in direct-gap GaAlAs under 3-D confinement 333
FORCHEL, A., SCHWEIZER, H., NATHER, H., ROMANEK, K.M., FISCHER, J. and MAHLER, G., Electron-hole plasma in direct gap semiconductors - a new non-equilibrium model 336
SCHMITT-RINK, S., LÖWENAU, J.P., HAUG, H., BOHNERT, K., KREISSL, A., KEMPF, K. and KLINGSHIRN, C., Theoretical and experimental studies of the transition from the exciton to the plasma phase 339
EGOROV, V.D., MÜLLER, G.O., WEBER, H.H., JACOBSON, M.A. and DITE, A.F., Control of carrier concentration by stimulated emission in highly excited direct gap semiconductors 342

7 - OPTICAL AND NON LINEAR OPTICAL PROPERTIES

ROWE, J.E., PEARSALL, T.P. and LOGAN, R.A., A study of the valence band structure of $Ga_{0.47}In_{0.53}As$ by angle-resolved photoemission 347
WILLIAMS, G.P., CERRINA, F., ANDERSON, J., LAPEYRE, G.J., SMITH, R.J., HERMANSON, J. and KNAPP, J.A., Study of III-V semiconductor band structure by synchrotron photoemission 350
SUGA, S., TANIGUCHI, M., SHIN, S., SEKI, M., SHIBUYA, S., SATO, K. and YAMAGUCHI, T., Reflectance and UPS studies of band structures and final state interactions of low-spin pyrites 353
VIÑA, L. and CARDONA, M., Optical constants of pure and heavily doped silicon and germanium: Electronic interband transitions 356
ASPNES, D.E., Surface transition region and visible-near UV optical properties of some semiconductors 359
KELSO, S.M., ASPNES, D.E., OLSON, C.G. and LYNCH, D.W., Optical determination of exciton sizes in semiconductors 362
JUSSERAND, B. and BONNEVILLE, R., Resonant Raman scattering in GaAlAs: first order active and disorder activated phonon lines. Theory of the IR dielectric susceptibility 365
SUGAI, S., HARRIS, J.H. and NURMIKKO, A.V., Strong electron-phonon interaction effects in modulated transient reflectance spectra of $Ga_{0.50}In_{0.50}P$ 368
BLUYSSEN, H.J.A. and VAN RUYVEN, L.J., Stimulated emission from shallow donors localized by a strong magnetic field 371
MESEGUER, F., MERLE, J.C. and CARDONA, M., Resonance-Raman scattering and electron-phonon coupling in the cuprous halides 374
YAMANE, M. and CHO, K., Phonon selectivity in resonant Brillouin scattering (RBS) from multi-component polaritons 377
SOORYAKUMAR, R. and SIMMONDS, P.E., Resonant Brillouin scattering in GaAs - linewidth measurements and the effect of stress 380
STOLZ, H., WASSMUTH, W., VON DER OSTEN, W. and UIHLEIN, C., Resonant Raman scattering at the indirect triplet exciton in AgBr in high magnetic fields 383
COLLINS, C.L. and YU, P.Y., Optical pumping of hot phonons in GaAs 386
SMIRL, A.L., BOGGESS, T.F., PERRYMAN, G.P., MILLER, A. and WHERRETT, B.S., Anisotropic state filling in semiconductors 389
FRÖHLICH, D. and REIMANN, K., Two-phonon *K*-space spectroscopy to determine the mixed-mode polariton dispersion in $AgGaS_2$ 392
HÖLSCHER, W., NÖTHE, A. and UIHLEIN, C., Investigation of bandmasses and *G*-values by two-phonon-magnetoabsorption (TPMA) in ZnSe 395
PASCHER, H., GRISAR, R. and BAUER, G., Optical four-wave mixing spectroscopy of PbSe epitaxial layers 398
LAVALLARD, P., DUONG, P.H. and ITOH, T., Nonlinear optical transmission of CdSe 401
BENSOUSSAN, M. and MOISON, J.M., Nonlinear photoemission from silicon *(invited)* 404
HILL, J.R., PARRY, G. and MILLER, A., Auger recombination and non-linear refraction in cadmium-mercury telluride at 10.6 μm 410
SMITH, S.D., SEATON, C.T., PRISE, M.E., FIRTH, W.J., TOOLEY, F. and PIDGEON, C.R., Optically bistable switching of a semiconductor resonance with a 30 ps pulse 413

8 - NARROW GAP SEMICONDUCTORS

ASAHINA, H., MARUYAMA, Y. and MORITA, A., Optical reflectivity and band structure of black phosphorus 419
NARITA, S., AKAHAMA, Y., TSUKIYAMA, Y., MURO, K., MORI, S., ENDO, S., TANIGUCHI, M., SEKI, M., SUGA, S., MIKUNI, A. and KANZAKI, H., Electrical and optical properties of black phosphorus single crystals 422
PFEFFER, P. and ZAWADZKI, W., Theory of free-electron optical absorption in n-InSb 425
RAYMOND, A., ROBERT, J.L., KURIAKOS, D.S. and ROYER, M., Impurity states in n-type $Hg_{1-x}Cd_xTe$ in high magnetic field and under hydrostatic pressure 428
DE CARVALHO, M.M.G., FAU, C. and AVEROUS, M., Energy gap dependence of the acceptor ionization energy induced by hydrostatic pressure at low temperature, near the sm–sc transition on $Hg_{1-x}Cd_xTe$ 431
DEVREESE, J.T., VAN WELZENIS, R.G. and EVRARD, R.P., Impact ionization probability and photo quantum efficiency in InSb 435
KUMAZAKI, K. and ABE, Y., Elastic anomaly near zero-gap state in narrow-gap semiconductors 438
SINGH, M. and WALLACE, P.R., Magneto-optics of cadmium arsenide 441
KRIECHBAUM, M., MEISELS, R., KUCHAR, F. and FANTNER, E., Theoretical and experimental studies of uniaxial stress enhanced spin-flip transition in n-InSb 444

9 - SEMIMAGNETIC SEMICONDUCTORS AND SPIN DEPENDENT PROPERTIES

BHATTACHARJEE, A.K., FISHMAN, G. and COQBLIN, B., Virtual bound state model for the exchange interaction in semimagnetic semiconductors such as $Cd_{1-x}Mn_xTe$ 449
REBMANN, G., RIGAUX, C., BASTARD, G., MENANT, M., TRIBOULET, R. and GIRIAT, W., Magnetooptical study of semimagnetic alloys $Cd_{1-x}Mn_xTe$ 452
SANDAUER, A.M., DOBROWOLSKI, W., KOSSUT, J. and GALĄZKA, R.R., Spin interaction enhanced anisotropy of the band overlap in $Hg_{0.97}Mn_{0.03}Te$ 455
NIEWODNICZANSKA-ZAWADZKA, J., ELSINGER, G., PALMETSHOFER, M., LOPEZ-OTERO, A., FANTNER, E.J., BAUER, G., ZAWADZKI, W., Influence of the exchange interaction on the bandstructure of $Pb_{1-x}Mn_xTe$ 458
GRYNBERG, M., Spin dependent effects in semimagnetic semiconductors *(invited)* 461
MORIWAKI, M.M., TAO, R.Y., GALAZKA, R.R., BECKER, W.M. and RICHARDSON, J.W., Photoluminescence bands related to localized Mn^{2+} transitions in diluted magnetic semiconductors 467
BLOM, F.A.P., NEVE, J.J. and NOUWENS, P.A.M., On the conduction band anisotropy in semimagnetic semiconducting $(Cd_{1-x}Mn_x)_3As_2$ alloys 470
JAROSZYNSKI, J., DIETL, T., SAWICKI, M. and JANIK, E., The exchange contribution to the binding energy of acceptors in CdMnTe 473
WOJTOWICZ, T. and MYCIELSKI, A., Magnetic field induced nonmetal–metal transition in the open-gap $Hg_{1-x}Mn_xTe$ 476
LINDSTRÖM., M., KUIVALAINEN, P., HELESKIVI, J. and GALAZKA, R.R., Photomagnetoresistance $Cd_{1-x}Mn_xTe$ 479
BALBERG, I., MAMAN, A. and HÉRITIER, M., Critical effects in ferromagnetic semiconductors 482
HEIMAN, D., WOLFF, P.A. and WARNOCK, J., Bound magnetic polarons and spin-flip Raman scattering in (Cd, Mn)Se 485
NHUNG, T.H. and PLANEL, R., Quantitative measurements of magnetic polaron binding on acceptors in CdMnTe alloys 488
DIETL, T., ANTOSZEWSKI, J. and SWIERKOWSKI, L., Hopping conduction of the bound magnetic polarons in n-CdMnSe 491
NURMIKKO, A.V., SUGAI, S. and HARRIS, J.H., Transient, polarized modulated reflection spectroscopy of near bandedge excitations in $Cd_{0.70}Mn_{0.30}Te$ 494
SAFAROV, V.I. and TITKOV, A.N., Optical spin orientation. Application to the study of photoelectron kinetics *(invited)* 497
FUJII, K., OHYAMA, T. and OTSUKA, E., Spin-hot electrons in photoexcited p-type InSb 502
KAUFMANN, B., NICHOLAS, R.J., BAUER, G. and VOGL, P., Optical pumping in PbTe epitaxial films 505

10 - LATTICE DYNAMICS AND ELECTRON PHONON COUPLING

KUNC, K. and MARTIN, R.M., Ab initio determination of static, dynamic and dielectric properties of semiconductors *(invited)* 511
MORITA, A., KANETA, C. and KATAYAMA-YOSHIDA, H., Lattice dynamics of black phosphorus 517
HAYASHI, S. and KANAMORI, H., Raman study of Ge and GaP microcrystals 520
WEYER, G., PETERSEN, J.W. and DAMGAARD, S., The lattice dynamics of substitutional tin on the two different lattice sites in III–V compound semiconductors 523
NAGAOSA, N., HANAMURA, E. and UCHIDA, S.I., Microscopic theory of Raman and infrared spectra of transition metal dichalcogenides in CDW state 526

SUZUKI, K. and MARADUDIN, A.A., Vibrational properties of silicon networks with vacancy, hydrogen, or fluorine 529
KUHL, J. and BRON, W.E., Lifetimes of LO phonons in GaP 532
KANELLIS, G., MORHANGE, J.-F. and BALKANSKI, M., Lattice vibrations of thin ionic slabs of GaAs 534
VAN CAMP, P.E., VAN DOREN, V.E. and DEVREESE, J.T., Microscopic calculation of the phonon frequencies of silicon, including exchange and correlation 537
STOCK, B. and ULBRICH, R.G., Measurements of dispersive phonon transport in galliumphosphide 540
TSEN, K.T., ABRAMSOHN, D.A. and BRAY, R., Raman probe of the large wavevector TA phonon bottleneck in GaAs 543
GLEMBOCKI, O.J. and POLLAK, F.H., Intervalley electron-phonon and hole-phonon scattering matrix elements in germanium 546
BASSANI, F. and GUIDOTTI, D., Polarization of T.A. and T.O. phonon assisted recombination luminescence in stressed silicon 549
HUANG, K. and GU, Z.Q., Frequency dispersion effects in multiphonon transitions 552
GRAUDSZUS, W. and GÖBEL, E.O., Free carrier screening of the Fröhlich interaction in GaAs 555

PART II

(second volume, pages 559–1046)

11 - PHASE TRANSITIONS

FROYEN, S. and COHEN, M.L., Static and structural properties of III–V zincblende semiconductors 561
YODER-SHORT, D.R., COLELLA, R. and WEINSTEIN, B.A., Charge density anomalies in Si and InSb preceding the high pressure transition 564
PEETERS, F.M. and DEVREESE, J.T., Instabilities of polarons in high magnetic fields 567
AOKI, K., MIYAMAE, K., KOBAYASHI, T. and YAMAMOTO, K., Phase transition and chaos in electrical avalanche breakdown caused by weak photoexcitation at 4.2 K in n-GaAs 570
BOPPART, H., REHWALD, W., KALDIS, E. and WACHTER, P., Study about the onset of intermediate valency in $TmSe_{0.32}Te_{0.68}$ under pressure 573
KATAYAMA, S., Theory of electronic Raman scattering from n-$KTaO_3$ 576
MULA, G., Analytic calculation of the structural properties of semiconductors 579
MÖLLMANN, K.-P., HERRMANN, K.H. and ENDERLEIN, R., Direct observation of ferroelectric phase in $Pb_{1-x}Sn_xTe$ 582

12 - LOW D MATERIALS - INTERCALATION - ORGANIC SEMICONDUCTOR

SUGAI, S., Generalized electronic susceptibility and charge density waves in transition metal dichalcogenides 587
OZAKI, H., MUTOH, T., OHSHIMA, H., OKUBORA, A. and YAMAGATA, N., Tunneling investigation of charge density wave energy gap in 1T-TaS_2 590
FRIEND, R.H., The electronic and magnetic properties of transition metal dichalcogenide intercalation complexes *(invited)* 593
HASEGAWA, K., MAEDA, A., UCHIDA, S. and TANAKA, S., Non-linear conductivity of monoclinic TaS_3 599
DUMAS, J., ESCRIBE-FILIPPINI, C., MARCUS, J., MERCIER, J., SALOMON, D., SCHLENKER, C. and RAZAVI, F., Electronic transition under pressure in the two-dimensional purple bronze $K_{0.9}Mo_6O_{17}$ 602
IZUMI, M., HARADA, S., YOSHIZAKI, R., UCHINOKURA, K. and MATSUURA, E., Shubnikov-de Haas oscillations in transition-metal pentatelluride 605
BOEBINGER, G.S., WAKEFIELD, N.I.F., MARSEGLIA, E.A., FRIEND, R.H. and TATLOCK, G.J., Transport and structural properties of the silver intercalation complexes of 2H-TaS_2 608
OHNO, T. and KAMIMURA, H., Electronic structures of higher stage graphite intercalation compounds 611
BATALLAN, F., ROSENMAN, I., SIMON, C., LAUTER, H. and FURDIN, G., Lattice dynamics of graphite intercalation compounds 614
BAERISWYL, D., HARBEKE, G., KIESS, H., MEIER, E. and MEYER, W., Optical transitions in oriented polyacetylene 617
ALBERT, J.P. and JOUANIN, C., Electronic properties of doped polyacetylene 620
DELRUE, J.P., BOUTIQUE, J.P. RIGA, J., VERBIST, J.J., CANIVEZ, Y. and LAUDE, L.D., UPS, XPS, and Auger spectroscopies of tetrathiotetracene (TTT) and bis (tetrathiotetracene)-triiodide (TTT_2I_3) organic semiconductor surfaces 623
ROLLAND, M. and ABADIE, M.J.M., Transmission electron microscopy study of undoped and doped polyacetylene films 626

13 - QUANTUM WELLS AND HETEROJUNCTIONS - LOCALIZATION

ENGLERT, Th., MAAN, J.C., UIHLEIN, Ch., TSUI, D.C. and GOSSARD, A.C., Oscillations of the cyclotron resonance linewidth with Landau level filling factor in GaAs/AlGaAs heterostructures 631
VOISIN, P., GULDNER, Y., VIEREN, J.P., VOOS, M., MAAN, J.C., DELESCLUSE, P. and LINH, N.T., Electron mobility and Landau level width in modulation-doped GaAs-$Al_xGa_{1-x}As$ heterojunctions 634
PINCZUK, A. and WORLOCK, J.M., Light scattering by two dimensional electron systems *(invited)* 637
BATKE, E., HEITMANN, D. and MOHR, E.G., Plasmons, intersubband resonance and localization in inversion layers with periodically structured gate electrodes 643
HÖPFEL, R.A., GORNIK, E., GOSSARD, A.C. and WIEGMANN, W., Plasmon excitation by Coulomb scattering of electrons in 2D systems 646
LINDEMANN, G., SEIDENBUSCH, W., LASSNIG, R., EDLINGER, J. and GORNIK, E., Cyclotron resonance studies of polarons and screening effects in GaAs 649
